

## **OPPORTUNITIES TO PARTICIPATE IN RESEARCH AND EARN \$\$\$**

### **DO YOU HAVE FIBROMYALGIA?**

#### **FIBROMYALGIA STUDY DETAILS**

Researchers at the University of New Brunswick and Saint Thomas University are conducting a study on intimate relationships and well-being in people living with fibromyalgia. We are interested in hearing your first-hand account on how living with fibromyalgia has impacted your relationship and well-being.

If you are a man or woman aged 19 or over, have been diagnosed with fibromyalgia, and are in a romantic relationship of at least 12 months, you can participate in this study. However, we will not be able to include people with certain serious illnesses. Since the interview and questionnaire can be done over the telephone, the study is open to all persons living in Canada.

By participating, you will complete a background questionnaire and participate in a digitally recorded individual interview with an interviewer of your own gender. The interview will take approximately 1.5 hours. Participation is voluntary and all information you choose to share will be kept confidential. All participants will receive a \$50 gift card as compensation for their time.

If you would like to participate or would like more details about the study, please contact Dr. Pablo Santos Iglesias at (506) 451-6996, or at [psantos@unb.ca](mailto:psantos@unb.ca). Please note that phoning or emailing to get more information about this study does not obligate you to participate. This research is on file with the Research Ethics Board, #2013-14.
